PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2+ years of experience building scalable, production-ready web applications using React, Next.js, TypeScript, and Node.js. Strong in performance optimization, API development, and end-to-end feature ownership.

EDUCATION

Noida Institute of Engineering and Technology (AKTU)

Bachelor of Technology in Information Technology

Greater Noida, UP

Oct 2023 – Jul 2027

EXPERIENCE

Full Stack Developer

Apr 2025 – Apr 2026

AdsFlicker

Remote – Full-time

- Developed and optimized core features for AdsFlicker's advertising platform, enabling advertisers and publishers to manage campaigns using modern web technologies.
- Built scalable full-stack modules for campaign management, tracking, and reporting supporting ad models such as CPA, CPC, and CPM.
- Designed responsive dashboards and dynamic UI components to monitor traffic, conversions, and campaign performance in real time.

Full Stack Intern

Oct 2024 – Mar 2025

InfiniSync

Remote – Intern

- Built full-stack features using React, TypeScript, and Node.js, integrating RESTful APIs and managing end-to-end data flow.
- Designed and implemented backend API endpoints and database schemas, collaborating with the team to deliver scalable features.
- Improved application performance by optimizing state management, refactoring UI components, and implementing real-time features using WebSockets.

Full Stack Developer

Apr 2024 – Sep 2024

AshnaAI

Remote – Internship

- Developed and maintained AshnaAI's AI-powered platform using Next.js, TypeScript, and Tailwind CSS with a focus on performance and responsiveness.
- Built dynamic UI components and integrated RESTful APIs to enhance user interaction and scalability.
- Collaborated with backend services to implement scalable features and ensure seamless data flow across the platform.

PROJECTS

PaperX | *Next.js, TypeScript, Upstox API, PostgreSQL, Drizzle ORM, Tailwind CSS*

- Built a **paper trading platform** for Indian markets with **Rs.10L virtual capital** and real-time NSE/BSE data via Upstox API.
- Integrated live candlestick charts using TradingView Lightweight Charts with 2-second price polling.
- Implemented secure user authentication and portfolio tracking to simulate real trading workflows.

RedCircle | *React, TypeScript, Tailwind CSS, Node.js, Express, PostgreSQL, Reddit OAuth 2.0*

- Built a platform to **tokenize Reddit posts as tradable assets**, enabling creators to list posts and curators to discover and trade them.
- Implemented a **gamified engagement system** with leaderboards, rich profiles, and performance metrics.

ReviewIQ | *React, TypeScript, TanStack Router, Node.js, Express, PostgreSQL, Docker, AI API*

- Built an **AI platform** to analyze GitHub Pull Requests with code insights, refactor suggestions, and issue detection.
- Implemented a webhook workflow with vector embeddings for context-aware PR analysis and automated static analysis.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Rust, Java

Frontend: Html, React, Next.js, Redux, Redux Toolkit (RTK Query), TanStack Query, Tailwind CSS, CSS

Backend & APIs: Node.js, Express.js, RESTful APIs, GraphQL, WebSockets

Databases & CMS: PostgreSQL, MongoDB, Supabase

Cloud & Tools: AWS, Docker, Git, GitHub Actions, CI/CD
