PROFESSIONAL SUMMARY

Full Stack Software Engineer with 1.5+ years of experience building scalable, production-ready web applications using React, Next.js, TypeScript, and Node.js. Strong in performance optimization, API development, and end-to-end feature ownership, with hands-on experience shipping **AI-powered products and autonomous agents**.

EDUCATION

Noida Institute of Engineering and Technology (AKTU)

Bachelor of Technology in Information Technology

Greater Noida, UP

Oct 2023 – May 2027

EXPERIENCE

Full Stack Fulltime

June 2025 – June 2026

AdsFlicker

Remote – Fulltime

- Developed and optimized core features for AdsFlicker’s advertising platform, enabling advertisers and publishers to manage campaigns using modern web technologies.
- Built scalable full-stack modules for campaign management, tracking, and reporting supporting ad models such as CPA, CPC, and CPM.
- Integrated **AI-powered campaign insights** — auto-generated ad copy suggestions and plain-language performance summaries from real-time traffic and conversion data.

Full Stack Intern

Dec 2024 – May 2025

AshnaAI

Remote – Internship

- Developed and maintained AshnaAI’s AI-powered platform using Next.js, TypeScript, and Tailwind CSS with a focus on performance and responsiveness.
- Built dynamic UI components and integrated RESTful APIs to enhance user interaction and scalability.
- Collaborated with backend services to implement scalable features and ensure seamless data flow across the platform.

PROJECTS

PaperX | *Next.js, TypeScript, Upstox API, PostgreSQL, Drizzle ORM* | [GitHub](#) | [Live](#)

- Built a **paper trading platform** for Indian markets with **10L virtual capital**, real-time NSE/BSE data, and live TradingView candlestick charts.
- Integrated an **AI trading mentor** that reviews virtual trades and explains market moves in plain language, helping beginners learn trading risk-free.

RedCircle | *React, Next.js, Node.js, Express, PostgreSQL, Solana* | **Generate. \$3.2K** | [GitHub](#) | [Live](#)

- Built and launched a platform to **tokenize Reddit and X posts as tradable SPL tokens** on Solana, reaching **approximately \$3.2K in activity** through the platform and token ecosystem after launch.
- Developed the full stack including React/Next.js frontend, Node.js/Express backend, and PostgreSQL database.

ReviewIQ | *React, TypeScript, TanStack Router, Node.js, Express, PostgreSQL, Docker, AI API* | [GitHub](#) | [Live](#)

- Built an **AI platform for GitHub Pull Request analysis**, providing code insights, refactoring suggestions, and automated issue detection.
- Implemented a **webhook-driven workflow with vector embeddings** for context-aware PR analysis and automated static analysis.

Souji | *Swift, Python, Chrome Extension (MV3), Gemini API, Whisper* | [GitHub](#) | [Live](#)

- Built a **Siri-style AI assistant for macOS** with voice control, LLM reasoning, screen vision, natural-language Mac automation, and local-first memory.
- Shipped an **autonomous job application agent** as a Chrome extension that ranks jobs against a resume using an LLM, generates tailored answers, and automates applications with a visible animated cursor.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Rust, Python, Swift

Frontend: HTML, React, Next.js, Redux, Redux Toolkit (RTK Query), TanStack Query, Tailwind CSS, CSS

Backend & APIs: Node.js, Express.js, RESTful APIs, GraphQL, WebSockets

AI: LLM integration (Gemini), agents & browser automation, vision AI, Whisper STT, vector embeddings

Databases & CMS: PostgreSQL, MongoDB, Redis, Supabase, SQLite

Cloud & Tools: AWS, Docker, Git, GitHub Actions
