PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2+ years of experience building scalable, production-ready web applications using React, Next.js, TypeScript, and Node.js. Strong in performance optimization, API development, and end-to-end feature ownership, with hands-on experience shipping **AI-powered products and autonomous agents**.

EDUCATION

Noida Institute of Engineering and Technology (AKTU)

Bachelor of Technology in Information Technology

Greater Noida, UP

Oct 2023 – Jul 2027

EXPERIENCE

Full Stack Developer

Apr 2025 – Apr 2026

RedCircle

Remote – Full-time

- Built a platform to **tokenize Reddit and X posts as tradable SPL tokens** on Solana, enabling creators to list posts and curators to discover and trade them.
- Developed the full stack including React/Next.js frontend, Node.js/Express backend, PostgreSQL database, and Solana/Anchor smart contracts.
- Implemented a **gamified engagement system** with leaderboards, rich profiles, and performance metrics.

Full Stack Intern

Oct 2024 – Mar 2025

AdsFlicker

Remote – Intern

- Developed and optimized core features for AdsFlicker's advertising platform, enabling advertisers and publishers to manage campaigns using modern web technologies.
- Built scalable full-stack modules for campaign management, tracking, and reporting supporting ad models such as CPA, CPC, and CPM.
- Integrated **AI-powered campaign insights** — auto-generated ad copy suggestions and plain-language performance summaries from real-time traffic and conversion data.

Full Stack Intern

Apr 2024 – Sep 2024

AshnaAI

Remote – Internship

- Developed and maintained AshnaAI's AI-powered platform using Next.js, TypeScript, and Tailwind CSS with a focus on performance and responsiveness.
- Built dynamic UI components and integrated RESTful APIs to enhance user interaction and scalability.
- Collaborated with backend services to implement scalable features and ensure seamless data flow across the platform.

PROJECTS

Souji | *Swift, Python, Chrome Extension (MV3), Gemini API, Whisper* | [github](#)

- Building a **JARVIS-style AI assistant for macOS** — voice control, LLM brain, screen vision, and natural-language Mac automation with local-first memory.
- Shipped an **autonomous job-application agent** (Chrome extension) that ranks jobs against a résumé via LLM, writes tailored answers, and auto-applies hands-free with a visible animated cursor.

PaperX | *Next.js, TypeScript, Upstash API, PostgreSQL, Drizzle ORM*

- Built a **paper trading platform** for Indian markets with **₹10L virtual capital**, real-time NSE/BSE data, and live TradingView candlestick charts.
- Integrated an **AI trading mentor** that reviews virtual trades and explains market moves in plain language, helping beginners learn trading risk-free.

ReviewIQ | *React, TypeScript, Node.js, Express, PostgreSQL, Docker, AI API*

- Built an **AI platform** that analyzes GitHub Pull Requests with code insights, refactor suggestions, and issue detection.
- Implemented a webhook workflow with **vector embeddings** for context-aware PR analysis and automated static analysis.

DevBond | *MERN Stack, REST APIs, JWT, Socket.IO, MongoDB*

- Developed a developer networking platform with **AI-powered résumé parsing** that auto-builds rich developer profiles for smarter matching.
- Implemented **real-time communication** using Socket.IO and secure JWT authentication for live developer interactions.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Rust, Python, Swift

Frontend: HTML, React, Next.js, Redux, Redux Toolkit (RTK Query), TanStack Query, Tailwind CSS, CSS

Backend & APIs: Node.js, Express.js, RESTful APIs, GraphQL, WebSockets

AI: LLM integration (Gemini), agents & browser automation, vision AI, Whisper STT, vector embeddings

Databases & CMS: PostgreSQL, MongoDB, Redis, Supabase, SQLite

Cloud & Tools: AWS, Docker, Git, GitHub Actions
